Steps to Change a Fender Panel

1. **Open your vehicle's hood.**
2. **Remove the fender mounting screws (2)** along the top edge of the fender with a socket and ratchet.
3. **Locate and remove the mounting bolts (3)** at the base of the fender just behind the fender well opening. (Inner fender liner may have to be removed to access screws)
4. **Remove the fender (1)** from the vehicle by pulling it away from the body.
5. **Reinstall in reverse order.**
6. You are done. Pat yourself on the back!
